Rani Durgavati University, Jabalpur (M.P.)

ABSTRACT: - Present study has been carried out from 2013-2016 at State Forest Research Institute during the detailed field survey from different forest divisions of Madhya Pradesh a total 89 samples of *Andrographis paniculata* were collected. These samples are representing to different forest types of 10 districts, 6 forest circle, 13 forest divisions, 30 forest ranges and 63 forest beats of Madhya Pradesh. The collected seeds of 89 samples were cultivated for assessment of growth parameters such as Height of plant (cm.), Number of branches/plant, Number of leaves/plant and their Green/fresh and Dry weight (gm). The observations were recorded from 15th day to 165th days. The maximum height of plants has been recorded on 15th day as 0.10 cm and 77.00 cm at 165th day. Other parameters namely Number of branches/plant ranges from 3 to 33, Number of leaves/plant 2 to 406, green biomass 70gms to 350gms and dry biomass 40gms to 197gms respectively on 15th and 165th days.

KEYWORDS: *Andrographis paniculata*, Growth parameter, Height of plant, Number of branches/plant, Number of leaves/plant, Green/fresh weight, Dry weight.

INTRODUCTION

Andrographis paniculata (Burm. F.) Wall. Ex Ness is an important medicinal plant and widely used around the world. It belongs to the family Acanthaceae. It is erect, much branched, glabrous, 40-90 cm high. Leaves linear-obovat or lanceolate, 5-8 x 1-2 cm, acute at apex, tapering at base, glabrous, shortly petiolate. Flowers in terminal, axillary, paniculate racemes, solitary: bracts opposite, lanceolate. Bracteoles 2 small or absent. Calyx lobes pubescent. Corolla white or purplish, glandular pubescent; lower lip with deep pink or purple markings inside at base. Capsules linear-oblong, ca 1.5 cm long. Seeds subquadrate, brown or yellow, rugose (Mudgal *et. al.*, 1997).

It grows mainly as under shrub in tropical, moist deciduous forest. The habitat of *A. paniculata* is in the forest, along roadside, plains, coastline, hills, farm and wastelands. It can grow in all types of soil. The worldwide distribution reported from countries like Sri Lanka, Malaysia, Taiwan, Bangladesh, Nepal, Indonesia, China, Thailand, East and West Indies and Mauritius

(Niranjan *et. al.*, 2010, Kataky & Handique, 2010). In India it is found especially in Tamil Nadu, Karla, Andhra Pradesh, Karnataka, Maharashtra, Uttarakhand, Chhattisgarh, West Bengal, Tripura, Jharkhand, Orissa, Bihar, Himachal Pradesh and Arunachal Pradesh (Pandey & Mandal, 2010). In Madhya Pradesh it is found naturally in forest area of Balaghat, Chhindwara, Dindori, Hosangabad, Jabalpur, Katni, Mandla, Narsinghpur, Seoni and Umariya districts.

It is also known as king of bitters due to its bitter taste and weak odor. The reason of bitterness, Andrographolide was isolated in pure form by Gorter (1911). The aerial parts, roots and whole plant of *A. paniculata* have been used for centuries in Asia as traditional medicine for the treatment of various ailments. As a whole plant it is used as Snakebite and insect sting treatment, dyspepsia, influenza, dysentery, malaria, respiratory infections (Chopra *et. al.*, 1980, Jarukamjorn *et. al.*, 2010). The fresh and dried leaves of *A. paniculata* and extracted juice are the official drugs of Indian pharmacopoeia and used as ulcers, chronic fever, malarial and intermittent fevers, inflammations, cough, bronchitis, skin diseases, colic, diarrhoea, dysentery, haemorrhoids etc. (Kumar & Kumar, 2013). The primary medicinal constituent of *A. paniculata* is Andrographolide used as antimalarial (Mishra *et. al.*, 1992), antidiarrhoeal (Gupta *et. al.*, 1993), hepatoprotective (Handa *et. al.*, 1990) and anti-inflammatory (Shen *et. al.*, 2002) activities.

The major bioactive constituents are a group of diterpene lactones (Wongkittipong, *et.al.*, 2000). Leaves of the plant contain several derivatives of diterpene lactones out of which andrographolide (bitter constituent) and neoandrographolide (non-bitter constituent) are important one (Akowuah, *et.al.*, 2006). The leaves contain maximum active morphoprinciples like andrographolide, homo-andrographolide, andrographesterol and andrographone carried out by Gorter (1911).

METHODS AND MATERIALS

The cultivation trial of 89 germplasm accessions were carried out in the State Forest Research Institute, Jabalpur. Seeds of 89 samples were sown during July 2014, by spreading methods. The growth parameters such as Height of plant (cm.), Number of branches/plant,

Number of leaves/plant, Green/fresh weight (10 plants/sample in gm) and Dry weight (10 plants/sample in gm) were recorded at an interval of 15 days i.e. at 15, 30, 45, 60, 75, 90, 105, 120, 150 and 165 days after sowing. The whole parameter wise data are analyzed and their results discussed in this paper in details.

RESULTS AND DISCUSSION

A cooperative account of morphological parameters such as Height of plant (cm.), Number of branches/plant, Number of leaves/plant, Green/fresh weight (10 plants/sample in gm) and Dry weight (10 plants/sample in gm) were computerized and analysed. As a result the parameter wise maximum, minimum and average values are determined and results are discussed below as: -

1. Growth parameter - Height of plant (cm)

On an average of 10 plants of each samples considered and their height of plant (cm) is measured, recorded, analyzed and resulted below in table-1 with sample code number and height on 15th day of interval. Comparative analysis revealed that maximum height of the plants recorded in sample number SAP-3 (0.78), SAP-1 (1.13), SAP-3&10 (7.28), SAP-59 (14.00), SAP-10 (28.00), SAP-76 (37.80), SAP-76 (51.60), SAP-76 (63.20), SAP-77 (74.00), SAP-77 (76.00) and SAP-77 (77.20) after 15th, 30th 45th, 60th, 75th, 90th, 105, 120th, 135th, 150th, 165 days. Whereas the minimum height of the plants of different samples were recorded in sample number SAP-1 (0.10), SAP-46 (0.43), SAP-15, 22, 32, 33, 34, 43, 69, 74 & 80 (3.00), SAP-2, 4, 5, 33, 40, 42, 43, 50, 63 & 80 (6.00), SAP-36, 44, 63 (11.00), SAP-44 (13.99), SAP-48 (23.18), SAP-63 (29.80), SAP-48 (36.70), SAP-45 (38.80) and SAP-45 (39.40).

2. Growth parameter - Number of branches/plant

The developments of number of branches in samples were started after 45th days and on 60th days the branches were recorded between 4-6 in numbers. The gradual development of branches initiated from 75th days to 165th day Table - 2. Maximum number of branches/plant of different samples was recorded in sample number SAP-3, 10, 14, 27, 31, 46, 54, 55, 57, 69, 76, 78, 83, 85, 86 & 89 (6), SAP-3, 10, 18, 22, 27, 39, 46, 54, 55, 57, 59, 76, 78, 79 & 84 (12), SAP-57, 76 & 78 (16), SAP-76 (23), SAP-76 (25), SAP-76 (32), SAP-76 (33) and SAP-76

(33) after 60th, 75th, 90th, 105, 120th, 135th, 150th and 165 days. Whereas the minimum branches/plant of different samples were recorded in sample number SAP-6, 7, 11, 17, 20, 24, 33, 35, 36, 39, 40, 42, 43, 47, 48, 49, 50, 58, 61, 63, 64, 68, 74, 80 & 81 (3), SAP-2, 4, 6, 7, 11, 15, 17, 19, 29, 33, 35, 36, 42, 43, 44, 48, 52, 56, 61, 63, 64, 68, 71, 74, 82 & 87 (8), SAP-6, 7, 12 & 19 (11), SAP-63 & 73 (14), SAP-44, 48, 63 & 64 (15), SAP-81 (16), SAP-81 (17) and SAP-81 (17).

3. Growth parameter - Number of leaves/plant

The numbers of leaves/plant were recorded first on main stem than it also developed on side branches. The numbers of leaves/plant were recorded branch wise than in whole plant. The gradual increase in sample from 2 to 406 at 15th and 165th days (Table – 3). Maximum numbers of leaves/plants of different samples were recorded in sample number SAP-55, 58, 64, 65, 70, 85 & 86 (6), SAP-84 & 88 (8), SAP-10 & 84 (13), SAP-57 (25), SAP-24, 25, 31 & 57 (40), SAP-85 (68.2), SAP-9 (134.4), SAP-54 (169), SAP-54 (233.00), SAP-54 (274) and SAP-54 (406.40) after 15th, 30th 45th, 60th, 75th, 90th, 105, 120th, 135th, 150th and 165 days. Whereas the minimum number of leaves/plants of different samples were recorded in sample number SAP-1, 28, 30, 31, 33, 34, 37, 39, 41, 43, 44, 46, 47, 59, 60, 61, 66, 67, 68, 71, 72, 74, 75, 78, 79, 80, 87 & 89 (2), SAP-4 (4.40), SAP-26, 33 & 43 (6.00), SAP-5, 26, 34, 35, 42, 61 & 63 (15), SAP-37 (20.00), SAP-11 (29), SAP-63 (37.80), SAP-15 & 63 (47.20), SAP-15 (66.20), SAP-63 (79.00) and SAP-63 (76.20).

4. Growth parameter - Green/Fresh weight and Dry weight (gm)

After 165th days the samples were harvested and their green biomass recorded from 70gms to 350gms. Whereas the day of different samples recorded 40gms to 196gms @ 50% dryage Table- 4. Maximum Green/Fresh weight (10 plants/sample in gm) of different samples were recorded in sample number SAP-25 (350) and Dry weight (10 plants/sample in gm) sample number SAP-60 (196) after 165 days. Whereas the minimum Green/Fresh weights (10 plants/sample in gm) of different samples were recorded in sample number SAP-27, 37 & 48 (70) and Dry weight (10 plants/sample in gm) sample number SAP-27 & 37 (40).

Table -1: Growth parameter - Height of plant (in cm.)

CONCLUSIONS

All the samples were cultivated for assessment of growth parameters. Comparative analysis revealed that maximum height of the plants recorded in sample number SAP-3 (0.78), SAP-1 (1.13), SAP-3&10 (7.28), SAP-59 (14.00), SAP-10 (28.00), SAP-76 (37.80), SAP-76 (51.60), SAP-76 (63.20), SAP-77 (74.00), SAP-77 (76.00) and SAP-77 (77.20) after 15th, 30th 45th, 60th, 75th, 90th, 105, 120th, 135th, 150th, 165 days, maximum number of branches/plant of different samples was recorded in sample number SAP-3, 10, 14, 27, 31, 46, 54, 55, 57, 69, 76, 78, 83, 85, 86 & 89 (6), SAP-3, 10, 18, 22, 27, 39, 46, 54, 55, 57, 59, 76, 78, 79 & 84 (12), SAP-57, 76 & 78 (16), SAP-76 (23), SAP-76 (25), SAP-76 (32), SAP-76 (33) and SAP-76 (33) after 60th, 75th, 90th, 105, 120th, 135th, 150th and 165 days., maximum numbers of leaves/plants of different samples were recorded in sample number SAP-55, 58, 64, 65, 70, 85 & 86 (6), SAP-84 & 88 (8), SAP-10 & 84 (13), SAP-57 (25), SAP-24, 25, 31 & 57 (40), SAP-85 (68.2), SAP-9 (134.4), SAP-54 (169), SAP-54 (233.00), SAP-54 (274) and SAP-54 (406.40) after 15th, 30th 45th, 60th, 75th, 90th, 105, 120th, 135th, 150th and 165 days and their maximum Green/Fresh weight (10 plants/sample in gm) of different samples were recorded in sample number SAP-25 (350) and Dry weight (10 plants/sample in gm) sample number SAP-60 (196) after 165 days. Sample codes SAP-77, SAP-76, SAP-54 and SAP-25 are very good results showed after 165 days.

ACKNOWLEDGEMENT

I am gratefully acknowledged to Dr. Anjna Sharma, Head, Department of Bioscience, R. D. University, Jabalpur, Dr. Dharmendra Kumar Verma, Director SFRI, Jabalpur, Dr. S. K. Masih, Senior research officer, SFRI, Jabalpur and Dr. R. P. Mishra, R. D. University, Jabalpur, for their kind guidance, supervision and encouragements.
