**ABSTRACT:-** Ayurveda system of medicine focuses on the fitness of body, mind and spirit, often called Holistic view. Physical manifestation of headache or palpitations may include insomnia, nervous disorders, emotional aspects like irritability, depression, anger or guilt and lake of determination etc. reflect one’s inner and spirituals vacuum. The paper deals with ethno-botanical use of green herbals species occurring in Katghora forest region of Korba district in Chhattisgarh. More than a dozen of plants are uses in different of the state by natives like Korwa, Kotwar, Panika, Gond, and khairwar as remedy for this disease. Some of which is less known, but very effective. This research paper is presented for treatment of headache problem from green Remedies.

**KEYWORDS:-** Green Herbal, Healthy, Tribals, Headache, power city, Korba.

**INTRODUCTION:-**

“Green gold” is global buzz word; in todays. Rediscover the remarkable curative power of vital herbs. Excess of bile from the liver or any damage to the liver affects the normal excretion of bile pigments may be responsible. Review of literature reveal that least of workers explored the medicinal wealth of this area. Headache was known to mankind as Tension, Migraines and Depression more than 3000 years ago as can be seen from Charak & Sushruta Samhita (400 B.C.). Plants and minerals have been utilized as success of remedy for headache from ancient times.

Katghora region is one of the sacred places of Chhattisgarh. Katghora is situated at 22.5°N 82.55°E and has an average elevation of 312 metres (1,024 ft). Radhasagar is a lake located in the heart of the city. Chak-Chakwa pahad(mountain) is located in the Katghora city, which is also known as Hanumangarhi. Katghora Krishi Vigyan Kendra is one of the KVK in Chhattisgarh. There are elevated topography and dense forests. The area of forest is inhabited by a large population, viz., Baiga, Korku, Kotwar, Panika, Gond, and Korwa. Some of these have a super natural basis to the tribal’s mind, while other are recognized as physical and attempts are made to treat them. They usually collect their materials from nearly forests and use them in their health care system, which is well developed and proven successfully for generation together. But today main contents are environmental pollution and stress of mind and body.

At present headache is very common problem but it may be certainly reason of death. Today 60 percent people has suffered from this problem in all over world. When we avoids some precaution, working system or changes our daily routine therefore we are faced to heavy headache problem.

**Type of Headache**

1. **Tension (Headache)** : May be caused by tense neck muscle due to stress. symptoms resolve with relaxation of muscles.  
   **Specific symptoms of problem:** pain is usually frontal.

2. **Migraine:** It is a disease from of headache. Causes are food sensitivities, menstrual irregularities, pollution, stress of body etc. It is associated changes in Tension within the arteries of the brain and it may last for a few minutes to several days.

   **Specific symptoms of problem:** Visual disturbances, preceding pain, pins and needles in limbs, Nausea and Vomiting to light sensitivity.

   2) **Neuralgia** : Severe burning or stabbing pain often felt along the course of facial nerve. It may follow injury or exposure to cold.  
   **Specific symptoms of problem:** Severe localized pain. Related area of skin, highly sensitive to touch.
Table – 01 : Green Remedies are arranged local and botanical name with their actions.

REVIEW THE LITERATURE:-

MATERIALS AND METHODS:-
The extensive survey has been made from April 2016 to June 2017. Collections of plants were made from different localities of Katghora forest divisions and of adjoining areas. Information regarding plants used by the tribes and rural folk in treatment of Headache in these regions were noted.

OBSERVATION:-
Plants species has been arranged local name followed by their Botanical name, place of collection, actions and uses as reported by the folk medicine practitioners. From this herbs are made various allopathic medicine by companies. Green Remedies are effective slowly and cut to roots of problems but allopathic medicines are fast work on problems and relief them.

RESULT & DISCUSSION:-
The above table: 1 shows that botanical herbs are organized into botanical names, local names, functions and doses. In the current environment, human headaches are dependent on their work style, stress, insomnia, depression and other issues. The table describes 5 analgesics, two irritating rests and one shooting.

In this table we can seen five green herbals the name of Ashwagandha roots, Ajwoin seeds, Betel leaves, Rasna roots & Vitex negundo leaves are analgesic or cooling action on headache; Eucalyptus oil and Sunthi (dry Zinger) are used for counter irritant action on headache; and caster oil or roots are also used for migraine and depression. The tribal people live at interior villages deep inside dense forest. They are dependent on many medicinal plants growing nearby. The present information on 08 species, which are frequently used in headache is accorded. The folk lore herbalists and tribals are very familiar with the disease and symptoms of Migraine, Tension, Neuralgia & depression in patients and mode of treatment with plants crude drugs. The knowledge of proper used of these green remedies is essential for treatment to those people who can not afford costly allopathic drugs.

CONCLUSION:-
The present study shows that medicinal plants have great potentially to treat of Headache. Selected green remedies used for the Headache is requiring knowing their therapeutic value. This will be helpful in better utilization of traditional knowledge. Therefore we should not do work that causes headaches. We should always be responsible for work and not take any tension for it.

ACKNOWLEDGEMENT:–
Author is thankful to Mrs. Anarkali Devi for collecting Green herbals and introduces their use of Headache, survey of villages and the principal of Government P.G. College Damoh (MP) providing facilities to carry out investigations.
